## 8. Profiling and automated decision-making

### Profiling

Profiling is a form of automated processing of your personal data in order to evaluate certain personal aspects relating to you to analyse or predict aspects concerning, for example, your personal preferences, interests, reliability, behaviour and location.

We use profiling and data modelling to be able to offer you specific services and products that meet your preferences, prevent money laundering, determine prices of certain services and products, evaluate the likelihood of default risk and for marketing purposes.

### Automated decision-making

Automated decisions are decisions made without the involvement of our employees (i.e. without human involvement).

For example, we use automated decision-making to establish your pension scheme and to grant treatments. Automated decision-making helps us make sure that our decisions are

quick, fair, efficient and correct, based on the personal data we have.

In relation to the prevention and detection of money laundering, we perform identity and address checks against public registers and check PEPs (politically exposed persons) and sanctions lists.

If the automated decision leads to an unfavourable result for you, the decision will be subject to manual processing (i.e. your case will be handled by one of our employees). This also applies to the majority of our cases concerning the conclusion of agreements for insurance products. For a small part of these cases, however, the process of setting up – or refusing to provide – insurance products, such as loss of earning capacity cover, is fully automated.

You have certain rights relating to automated decision-making. Please see “Your rights” and “Automated decision-making” below.

## 9. Recording of phone conversations

Incoming and outgoing calls may be recorded and stored to document what was said, what happened, and what was agreed during the conversation. We refer to <https://danicapension.dk/en/more-danica/recording-of-phone-conversations> for more details on our processing of personal data and your rights in that respect.

## 10. For how long do we store your personal data?

We store your personal data only for as long as it is needed for the purpose for which your data was processed.

This means that as a general rule we store your personal data for as long as we are providing a service or a product to you. When your customer relationship with us has ended, we store your personal data for another ten years. The storage period complies with the principles of limitation under the Danish Statute of Limitations Act (*forældelsesloven*).

In certain circumstances, we store your data for a longer period of time:

We store personal data provided in connection with an offer that was not accepted for a period of six months after the rejection/expiry of the offer.

We store personal data collected with a view to complying with the Danish Anti-Money Laundering Act for a period of five years after the customer relationship has ended.

Surveillance videos are deleted 30 days after they were made in accordance with applicable law. In certain circumstances, and in connection with a specific case, the data may be stored for a longer period.

Phone conversations are deleted after the period set out [here](#).

You have the right to have your data erased, provided the data is no longer necessary in relation to the purposes for which it was collected.

However, in the following cases, we may be or are required to store your data:

Please note, however, that if you withdraw your consent, we may not be able to offer you specific services or products. Please also note that we will continue to use your personal data, for example for the performance of an agreement we have made with you, or if we are required by law to do so.

### Data portability

If we use data based on your consent or as a result of an agreement, and the data processing is automated, you have the right to request a copy of the data you have provided in a digital machine-readable format.

## 12. Changes to this privacy notice

We may change or update this privacy notice on a regular basis. In case of a change, the 'effective from' date at the top of this document will be changed.
