

Danica Health Insurance – psychology treatment

Danica Pension has an agreement with Falck Healthcare about easier access to psychology treatment for customers with a Danica Health Insurance (including psychology cover).

This means that you have access to a hotline, the waiting period for treatment is shorter and you do not have to lay out money for the treatment yourself.

The agreement

- The insured is contacted by Falck Healthcare and referred to a psychologist at the latest one hour after Danica Pension has approved the claim.
- The insured will be referred to a psychologist with specific expertise in relation to the situation, the insured is in.

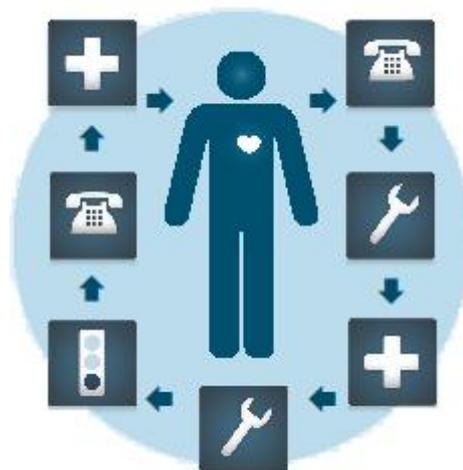

- The insured starts treatment faster. If there is no public grant for the treatment, the insured will be in treatment within five weekdays maximum. If there is public grant, the insured will be in treatment within 15 weekdays maximum – and most likely even faster.
- The insured does not have to lay out money for the treatment.

Hotline

It is possible for employees, colleagues and managers to call the hotline at Falck Healthcare at 70 22 02 23 and obtain advice about mental problems – for example in case of serious illness or divorce. In such case, the insured does not need to contact Danica Pension beforehand – or to report a claim.

The procedure

7. You are receiving treatment
6. You are contacted by Falck Healthcare to help you proceed
5. Danica Pension approves treatment

1. You can contact the hotline at Falck Healthcare for acute advise
2. Fill in a report on danicapension.dk. Print it out and bring it to your doctor
3. You need a referral from your doctor, if there is public grant to the treatment. If not, you need a recommendation from your doctor

4. Send the completed form to Danica Pension
